

E4B | Entrepreneurship for Biomedicine - Summer 2020 Course

Work with biomedical research trainees from across the nation to innovatively solve problems in these challenging times. Participate in the 12-week summer program of the NIH-funded Entrepreneurship for Biomedicine (E4B) training program.

E4B is free and taught fully online through Washington University in St. Louis. You will develop skills in entrepreneurial thinking that can be applied whether you continue in academia, work in industry, form a nonprofit venture, or create a new startup!

Applications for summer 2020 are open and spots are limited!

Application and additional information are available at e4b.wustl.edu!
