

The School of Engineering & Applied Science is pleased to announce the fifth annual call for its seed grant program: Collaboration Initiation Grants (CIG).

CIG aims to

- encourage connections across departments & schools;
- promote an understanding of research across campus;
- provide pilot data funding for high risk/high reward projects; and,
- serve as platforms for external grant applications.

Only junior, untenured SEAS faculty may serve as lead PI; however, any tenure-track or research faculty at Washington University may serve as Co-PI. Up to three \$20,000 awards will be made. Cost sharing is required.

Past CIG awardees are required to review for two cycles of the CIG program.

Proposals should be submitted via Qualtrics by Monday, March 4, 2019:
wustl.az1.qualtrics.com/jfe/form/SV_4HggQ6s5YCRvJoF

Additional information, including previous awardees, is available at:
sites.wustl.edu/engineeringresearchtoolkit/items/seas-collaboration-initiation-grant-cig/

If you have any questions, please contact Natalie Goodwin-Frank (frankn@wustl.edu), Patience Graybill (patience.graybill@wustl.edu), or Erin Plut (eplut@wustl.edu).
