

DDRCC PILOT & FEASIBILITY AWARDS CALL FOR APPLICATIONS 2019-2020 Cycle

The Digestive Diseases Research Core Center (DDRCC) is again soliciting applications for our upcoming cycle of pilot & feasibility awards. Support will be provided for the purposes of testing innovative hypotheses which may have significant impact on the field of digestive diseases research and for obtaining preliminary data sufficient for extramural funding of future research grant applications by conventional mechanisms. I would urge you to consider applying and to encourage faculty members and senior fellows to consider doing so also. Details of the application are below and on our webpage ddrcc.wustl.edu

Qualifications:

Full time faculty and current senior post-doctoral fellows with a faculty appointment effective as of July 1, 2018 at Washington University, including:

1. Junior investigators without independent grant support (excluding career development awards) seeking to establish independence in this field of research;
2. Investigators with independent grant support (past or present) who have not been involved in digestive diseases-related research wishing to enter this field;
3. Investigators with independent grant support who have previously worked in this field but wish to pursue a new research direction.

Award Details:

Awards of up to \$30,000 in **DIRECT COSTS**, per year, for one to two years (latter based on competitive renewal).

Grant Submission Deadline:

Application Due Date: Friday, May 3, 2019, 5:00PM

Funding Period: July 1, 2019- June 30, 2020

Email completed application files to pfddrcc@dom.wustl.edu.
