

Agency: [Neuroendocrine Tumor Research Foundation](#)

Four Funding Opportunities: [Accelerator](#), [Investigator](#), [Pilot](#), and [Mentored](#)

Overview: We invite innovative and transformative research proposals in neuroendocrine tumors (NETs) to help bring the field closer to more effective therapies. We are equally interested in basic, translational, and clinical research applications, and encourage collaborations between investigators with expertise in different fields. We are very interested in grant proposals from multidisciplinary groups comprised of basic scientists, clinicians, and experts in bioinformatics, bio-nanotechnology, or other relevant disciplines. Proposals that cover promising and potentially transferable mechanisms and/or technologies, which have been applied successfully to other areas of cancer research, are highly desirable and will be evaluated based on their level of applicability to NETs.

Eligibility: The Neuroendocrine Tumor Research Foundation (NETRF) seeks investigators and teams with the tools to study neuroendocrine cancers in innovative and transformative ways. Applicants must have a faculty appointment (assistant professor and above). Applicants must have the skills, knowledge, and resources necessary to carry out the proposed research. Applicants must have an MD, PhD, MD/PhD or equivalent degree. Candidates must demonstrate a commitment to continue with NET research and the potential for further development in this area.

Funding Opportunities:

1) [Accelerator](#) Award

Award Amount: \$1,200,000 over four years

2) [Investigator](#) Award

Award Amount: \$300,000 over two years

3) [Pilot](#) Award

Award Amount: \$50,000 or \$100,000, one year

4) [Mentored](#) Award

Award Amount: \$120,000 over two years

Letters of Intent are due **June 17, 2019** and must be submitted via [ProposalCENTRAL](#).
